

# Build Night 2

# Review

- Papers
  - Taxonomy:
    - Limitations of data collection methods
    - Pros and cons of this kind of clustering
    - Significance of conclusion
  - Survey:
    - Issues with Projection?
    - Difference between their optimization methods and our project goal?
- Heat Map
  - Accuracy?
  - What trends can you see?

# Next Tasks

- Finish Survey paper (Sections 4 - 5)
- Read Adaptive 360-degree video streaming paper
  - Tradeoff between Prediction accuracy and size of video
  - Tile based Streaming - Pros and cons
  - What is scalable video coding?
- Turn Heat map frames into heat map videos
- Discuss Statistics
  - Which statistics would be important to measure?
  - How would we measure them?
